

Properties of Common Objects

Your task is to describe the **properties** and **purposes** of some common objects.

Some of the **properties** used to describe common materials such as food, clothing, writing materials and sports equipment are **strong, hard, fluffy, solid, smooth, soft, liquid, bends, floats, shiny, sinks, translucent, opaque, flexible, sticky, light, runny or heavy.**

Here's an example of a school cap.

Purpose (what it has to do)
Protect your face from the sun
Change size to fit your head size

Materials

Cotton
Plastic
Velcro

Properties

Flexible
Light
Cool
Soft

In each box below, **draw** a common object and then **describe** its purposes, materials and properties.
