

*Cut out each statement. Then reorder the statements in correct order starting with the title. Glue these into your notebook.*

**TITLE: SEPARATION OF A MIXTURE OF IRON FILINGS, SALT, CHALK POWDER AND WATER**

Dissolve as much of the mixture as possible

Add water and stir

Filter the mixture so that the soluble salt will be obtained in the filtrate and the insoluble chalk powder will be the residue on the filter paper

Place the dry mixture into a beaker

Dry out the filter paper to keep the dry chalk powder

Use a magnet to attract and extract the iron filings from the dry mixture

Pour the filtrate into an evaporating basin to evaporate the water and leave behind the salt
