

TYPES OF SIMPLE MACHINES

A simple machine is any device that makes our life easier or more effective. It may make something easier to move, change the direction of an object and so on.

The four simple machines are:

- Lever (e.g. hammer, seesaw)
- Inclined Plane (e.g. ramp, wedge)
- Wheel and Axle (e.g. door knob)
- Pulley (e.g. block and tackle)

Match a picture of a device below with the simple machine it involves.

LEVERS	INCLINED PLANES	WHEEL AND AXLE	PULLEY
